---

As a Full Stack Developer, I am keen to find an organization where I can apply my skills, actively contribute, and continually advance my knowledge for the benefit of both the company and my professional growth. I possess expertise in various programming languages, including React, Redux, JavaScript, HTML, CSS, and Java, making me a valuable asset for the organization's development initiatives.

EDUCATION

Sher Shah College	(May 15, 2018 - September 28, 2022)
Bachelor Of Computer Application, Computer Science	7.2

PERSONAL PROJECT

Chat Application   (June 05, 2023 - July 11, 2023)
Full Stack Developer

- Developed a real-time chat application using React.js, Node.js, Express Js, and Socket.IO.
- The application allows users to join different chat rooms based on their interests and communicate with each other in real time.
- Implemented features include sending and receiving messages, displaying messages with timestamps, and joining specific chat rooms.
- Managed state using React hooks to update message lists and input fields dynamically
- Technologies Used: Frontend: React.js, React Router, Moment.js. Backend: Node.js, Express Js. Real-time Communication: Socket.IO. Styling: CSS, Bootstrap

E-Commerce Website   (August 09, 2023 - September 13, 2023)
Full Stack Developer

- I have successfully created an e-commerce website that offers a wide range of products to users, with the added convenience of Firebase authentication.
- Authentic users can enjoy a seamless shopping experience, including the ability to view products and add or remove items from their shopping carts.
- To efficiently manage cart data, the project utilizes a CRUD Rest API, ensuring that users can easily update their selections.
- The technology stack employed in this project includes HTML, CSS, JavaScript, React JS, and Redux, resulting in a modern and user-friendly shopping platform.

Data Visualization Dashboard   (January 02, 2024 - February 12, 2024)
Full Stack Developer

- Developed a dynamic data visualization dashboard using MERN Stack technologies.
- Created interactive graphs and charts using chart.js for key variables such as intensity, likelihood, and relevance.
- Implemented filters for country, topics, sector, region, and city.
- Using MongoDB for efficient data storage and retrieval, with Node.js and Express JS APIs for seamless integration.
- Demonstrated proficiency in frontend (React.js) and backend (Node.js) development.
